

Why Does the Inland Empire and the Rest of California Urgently Need Health Care Reform?

1 Residents of the Inland Empire and California are More Likely to be Uninsured.

Uninsured Rate ¹	
	23.9% ← Residents of Representative Bono Mack's district in Palm Springs
	23.3% ← Residents of Representative Baca's district in San Bernardino
	21.3% ← Residents of Representative Calvert's district in Riverside
All Californians →	20.4%
	20.2% ← Residents of Representative Lewis' district in Redlands
	18.2% ← Residents of Representative McKeon's district in Santa Clarita
All Americans →	17.2%
	16.4% ← Residents of Representative Dreier's district in San Dimas

➔ Expand & strengthen coverage so that all Californians have access to quality, affordable insurance choices.

2 Private Coverage is Becoming More Expensive & Less Reliable in the Inland Empire and State.

Like the rest of America, about three of every five Californians have health insurance coverage through their employer, however private coverage is becoming a more expensive and less reliable source of coverage for many Californians because:

- Employment-based coverage has been declining throughout California over the past decade;²
- In the past year, about 108,000 workers in the Inland Empire have lost their jobs,³ and likely their health coverage too;
- Premiums for job-based coverage in California grew over eight percent in 2008 (compared to under five percent nationally);⁴
- Consumers are not well protected in the individual insurance market and can be denied coverage for pre-existing & chronic conditions;⁵ and
- Californians with private insurance pay an average of 10.5 percent more in premiums to account for the cost of care to the uninsured.⁶

➔ Make private health coverage more secure and affordable for working families and low-income individuals.

3 Public Programs & Clinics Are Important for the Area's Diverse & Growing Health Care Needs.

- One out of three low-income residents (earning less than \$36,620 for a family of three) of Riverside and San Bernardino Counties has coverage through Medi-Cal or Healthy Families.⁷
- Access to culturally competent health care services is especially important for the diverse communities of Riverside and San Bernardino Counties where 43 percent are Latino.⁸
- Almost one million *more* people will be living in the Inland Empire by 2015,⁹ and the health care system must be ready and able to handle the increase.

➔ Protect the public health safety net and ensure the system's long-term sustainability by improving the quality of care.

HEALTH CARE
FOR AMERICA **NOW!**

This factsheet was prepared by Health Access, a statewide coalition of consumer, labor, ethnic, senior, faith, and other organizations that has been dedicated to achieving quality, affordable health care for all Californians for over 20 years. Please visit our website and read our daily blog at www.health-access.org.

Health Access is leading the California campaign of Health Care for America NOW! (HCAN), a national grassroots campaign of more than 850 organizations representing 30 million people dedicated to winning quality, affordable health care we all can count on in 2009. Visit www.healthcareforamericanow.org or contact Patrick Romano at promano@health-access.org for more about the California HCAN campaign.

For media inquiries, please contact Cynthia Craft at ccraft@health-access.org.
